

MAKE THE FIRST ACQUAINTANCE EASY.

Wingman

Social Interaction Facilitation Technology. Make the first acquaintance easy.

- SOCIAL INTERACTION FACILITATION TECHNOLOGY
- NOT A DATING APP
- INVESTOR DECK

Product Owner: Igor Chernikov · Spec V3.1 · Prepared for investors, partners & users
Confidential — factual status as of August 2026 repository documentation.

THE OPPORTUNITY

The first acquaintance is still unsolved

People cross paths daily with someone they'd like to meet — and say nothing.

Dating apps optimized remote discovery and engagement. Wingman optimizes the last meter: mutual, local, time-boxed permission to say hello.

Pew (US): 53% of adults under 30 have used online dating; experiences often mixed (2022 survey, published 2023).

WHAT WINGMAN IS

Make the first acquaintance easy.

Wingman facilitates the first real-world interaction between people who are already near each other — or who repeatedly cross paths through Destiny Connection.

Category: Social Interaction Facilitation Technology. "Real-world connection facilitator" is explanatory wording only.

Radar → Signal → Selfies → Mutual → Mission → Cooldown

Wingman does not help you collect matches. Wingman helps you make the first acquaintance. Constraints: Free 2 Signals/day · 1 active connection · ~15 min Mission chat.

NOT A DATING APP

PHILOSOPHY DIFFERENCE

Dating apps

- Public profiles & photos
- Swipe → match volume
- Endless chat in-app
- Optimize time-in-app
- Explicit rejection UX
- Remote discovery

Wingman

- No public profile browsing
- Signal → mutual consent
- ~15 min Mission Meet
- Optimize real meetings
- Silent expiry only
- Already nearby

WHY USERS WOULD USE IT

Lower social risk

Silent expiry. No public profile browsing.

Mutual clarity

Connection only after mutual validation.

Real outcome

Short Mission designed to meet — then leave the app.

PRODUCT PROOF POINTS

Built A

Frozen protocol engine · NestJS API · Postgres/Redis · WebSocket · Billing→Entitlements · Backend V1 GO (S20).

Flagged B

Radar Intelligence, Context, Destiny V2, Anti-Abuse, Geo, Measurement (learning OFF).

Validating C

Surface UI live · Live Field Test S27–S34 · S27A OPEN · SMS OTP deferred.

Vision D

Public Destiny, payments go-live, city density expansion, learning after baselines.

Trust is the product

Consent

Per-purpose, versioned, append-only.

Disclosure

Approximate location · ephemeral selfies · anti-contact chat filter.

Abuse

Block/report · graduated anti-abuse · no auto permanent bans.

Wingman does not guarantee physical-world safety. It designs for consent and control.

MONETIZATION

Freemium + intentional one-time Passes

Wingman+ €9.99/mo (spec)

More Signals, longer tickets, slightly longer windows. Discovery priority increases probability — never guarantees exposure.

One-time

Night Pass · Event Pass · Verified Selfie · Rematch · Cool Down Skip.

Never: boosted profiles, ads in meet flow, selling behavioral data.

Payments architecture exists; checkout disabled. Unit economics: HYPOTHESIS TO VALIDATE.

GTM

Density-first EU city

Seed venues and events where co-presence is already natural. Expand city-by-city when meeting quality holds.

Growth gated by real-meeting outcomes — not vanity engagement.

MARKET

TAM

Online dating / social discovery — multi-billion globally; definitions vary by analyst.

SAM

EU online dating: public estimates ~\$0.6B–\$1.2B range depending on source — Wingman addresses a proximity subset.

SOM

HYPOTHESIS TO VALIDATE: first dense city cohort. No fabricated forecasts.

COMPETITION

Tinder/Bumble optimize matches. Wingman optimizes one real approach — then returns you to Radar.

WINGMAN PROTOCOL

Then back to Radar. One intentional loop — not an endless feed.

SIMPLIFIED ARCHITECTURE (CONFIRMED)

Mobile / Web Client**NestJS API + WS****Workers (reconcile)****PostgreSQL durable****Redis ephemeral****Providers: SMS / Push / Stripe****Frozen domain: packages/domain (WingmanEngine)**

TRACTION STATUS

Honest traction

- Backend V1 certified GO (2026-08-09)
- Advanced engines implemented with flags + measurement lock
- Mobile-first surface deployed for UI fielding
- Live Field Test board active — not yet Field Test Ready
- No public revenue; payments OFF
- Destiny not marketed as public core

RISKS

Cold-start density

Protocol needs co-presence. Mitigate via venue/event seeding.

Trust & safety

Physical meets carry risk. Mitigate via design + education + moderation ops.

Positioning confusion

Misread as dating app. Mitigate via ruthless messaging discipline.

Execution gate

Must clear Live Field Test before pilot claims.

Protocol encoded before scale theater

Wingman invested first in correct state machines, entitlements, safety invariants, and certification — then advanced intelligence behind flags — then a disciplined field-test track.

Product Owner: Igor Chernikov. Spec V3.1. Governance: facts before tickets.

THE ASK

FUNDING SCENARIO — TO BE DEFINED

This deck does not invent a raise size, valuation, or revenue plan.

Near-term use of capital (illustrative categories only)

- Complete Live Field Test (S27–S34)
- Production identity/SMS and multi-device reliability
- First-city density pilot operations
- Safety/moderation capacity

METRICS THAT MATTER

North star: confirmed real-world meetings.
