

MAKE THE FIRST ACQUAINTANCE EASY.

Wingman

A calm way to say hello to someone nearby —
privately, mutually, briefly.

- SOCIAL INTERACTION FACILITATION
- NOT A DATING APP
- USER OVERVIEW

Product Owner: Igor Chernikov · Spec V4.1 · Prepared for investors, partners & users

THE IDEA

You notice someone. Wingman helps you check if it's mutual — without a public profile circus.

Not a dating catalogue

No endless swiping. No public photo browsing.

Built for real life

Café, campus, conference, festival — when you're already near.

HOW IT WORKS

WINGMAN PROTOCOL

RADAR

SIGNAL

SELFIE A

SELFIE B

MUTUAL

MISSION

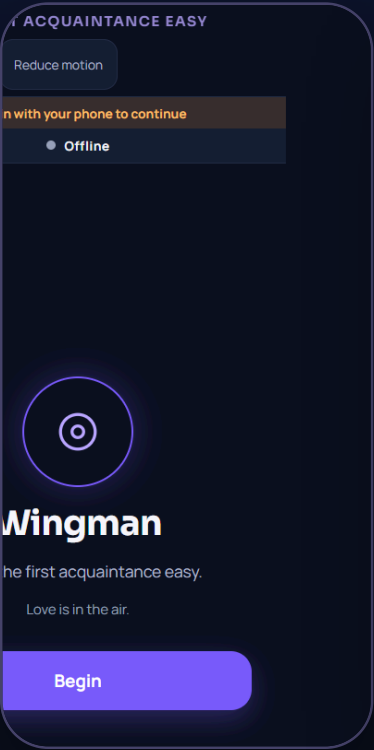

MODE

COOLDOWN

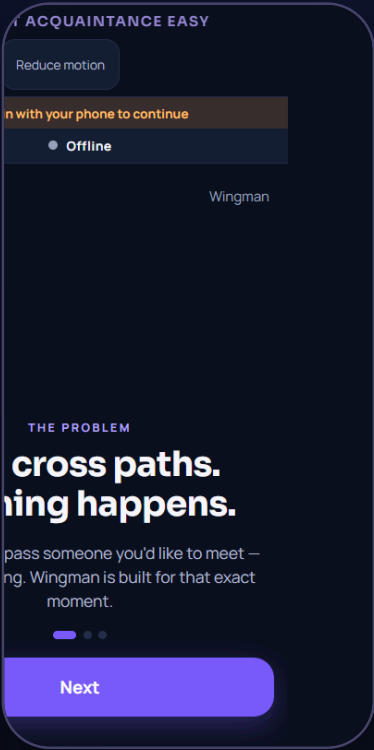

Then back to Radar. One intentional loop — not an endless feed.

Free: 2 Signals per day. One connection at a time. About 15 minutes to arrange a meet.

OPEN WINGMAN

WHY IT EXISTS

SAFETY & PRIVACY

You're in control

Invisible mode. Block. Report. Destiny off by default.

Approximate location

Others don't get your exact pin.

Be smart IRL

Meet in public. Wingman helps with consent — it can't guarantee safety.

FAQ

Do they see if I ignore a Signal?

No rejection message. It simply expires.

Is my phone number shared?

No. Used for identity — never shown to other users.

Can I chat forever?

Mission Meet is short on purpose — so you meet in real life.

From presence to hello.

Wingman helps you make the first acquaintance.

Field-test surface; product UI evolving · some builds may be demo-mode without full backend.
